PRINTING SOLUTIONS

INTEC HPP500

The versatile and affordable envelope printing and mailing system that delivers unrivalled productivity

- Feeds a wide variety of media up to SRA3
- Perfectly paired for use with Variable Data Applications
- Ideal for envelopes, card stock, labels and much more
- Top loading friction feeder allows reloading and unloading while printing
 - Cost effective and easy to use

Intec HPP500

The Intec HPP500 delivers powerful production capabilities usually found in more expensive envelope printing systems. The robust, multi-functional friction feeder allows continuous printing of envelopes, postcards and other media ensuring you can meet your customer's demands, on time, every time.

By combining the friction feeder, Intec CP2020 printer and the shingling conveyor Intec Printing Solutions have addressed the need for high quality productivity and reliability at a fraction of the cost normally associated with this type of system.

With the Intec HPP500 you can continuously print envelopes, postcards and other media opening up new revenue streams for you and new ideas for your customers.

The friction feeder is fast and easy to set up so you can move quickly from one job to another with the minimum of downtime. Productivity is further increased with the HPP500 system accepting a maximum sheet size of 320mm x 457mm allowing multiple pages to be printed on each sheet.

In today's uncertain and demanding market the Intec HPP500 ensures you are always ready to meet your customer's needs, delivering high quality print on time, all the time.

Features

Feeds a wide variety of products and size:

- Envelopes
- Card stock
